

TOKENOMICS

An Overview of the Sardis Main Coins

SARDIS ECOSYSTEM

Sardis is a carefully crafted Layer 1 blockchain ecosystem on Hybrid PoS consensus (PoS+PoA) which is actively running **Bridge, Swap/Dex, and Stake, 2 mainnets**, and **1 testnet feature**. Sardis has acquired necessary licenses like **FINCEN, BSA**, and **Utility Token Security Opinion** which makes it a Regulation-ready blockchain.

The **Sardis Ecosystem** is the digital disruption for traditional financial services. **Sardis Blockchain Network** has the power to revolutionize payment solutions and current blockchain technology with its most efficient features such as partly decentralization, transparency, scalability, security, stability with stablecoins, low-cost, and high-speed horizontal scaling.

SARDIS MAINNET

Sardis HPoS is a hybrid between Proof of Authority(PoA) and Delegated Proof of Stake(DPoS). With Sardis' hybrid proof of stake consensus, a limited number of base hash power miners generate the blocks for transactions to be written on. Active validators then validate the transactions on the mined blocks and write them onto the blockchain. The selected POS validators also do checkpoints, which is a mechanism that improves the security of a blockchain by making the blocks behind the checkpoints irreversible regardless of any reorgs, permanently preventing blocks older than a specific set value from being reorganized, thus rendering the blockchain much more difficult to tamper with and considerably more secure.

Sardis adopts open source HPoS consensus mechanism with low transaction cost, low transaction latency, high transaction concurrency. Out of certain amount of candidate nodes, 21 are elected(active) validators for each chain. These validators are selected on a few criteria. When any active validators encounter instability problems, they can be quickly replaced by candidates in the next epoch.

Sardis Mainnet is designed to support NFTs, dApps and smart contracts. Purpose-built design developed by Sardis Labs delivers seamless digital user experience across the touchpoints of our user journey and aims for developers and companies to partner with Sardis to sell their digital assets and build blockchain-based projects. Sardis encourages cooperation, collaboration and engagement with its users and developers worldwide for the purpose of continuous innovation and improvement.

SARDIS PAYMENT MAINNET

Sardis Payment mainnet is a hybrid proof of stake blockchain with EVM smart contract capabilities. The payment mainnet is dedicated to handling only the ledger and finalization activities of its native coin, the SRDS. The SRDS coin can be used for smart contract developments, securely transferring data within parties in nodes, in external transfers/payments, and internally it will be swapped with the SRDX coin on the Sardis bridge.

The “SRDS” cryptocurrency minted can be purchased by end users to facilitate cheaper transaction fees and earn staking awards. The smart contracts on the main blockchain govern the behavior of the smart and stabilizing wallets.

SARDIS CONTRACT MAINNET

The contract mainnet is responsible for providing the computational power to 99% of the smart contracts running on the Sardis Ecosystem. The native coin of the chain, SRDX is minted 314+ million and for only internal usage. The SRDX is used in the payment of all validators in the system, including those of stablecoin chains, and the payment chain. Our unique V+ validator system is built on the SRDX chain. The SRDX coin is pegged to a one-to-one dollar. The contract mainnet also carries the smart contracts of the Sardis bridge and dApps running on the network. Our aim is to scale the computational needs of the ecosystem and distribute them to two chains, thereby avoiding lag in operations that occur in traditional setups over time.

USAGE OF SARDIS COINS

Expenses: SRDS and SRDX will be used to pay for the expenses on both the Stablecoin Exchange and Social Payment App.

Nodes: Staked Sardis Coins serve as an economic incentive to act in Sardis Network's interests.

Rewards: Active validators and de on the network will be rewarded with Sardis Coin.

NFTs, dApps and Smart Contracts: Fees on smart contract, expenses for dApps and NFTs are paid by Sardis Coin.

SARDIS COIN

Ticker: SRDS

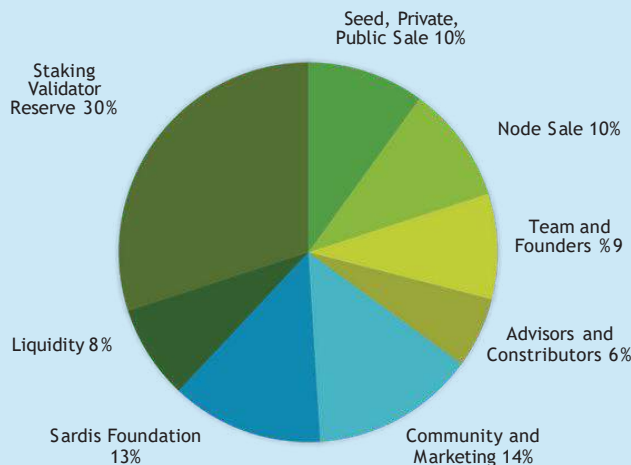

Total Supply: 314,159,265

Initial Circulating Supply: 2%

Sardis Coin is the native token of Sardis payment mainnet blockchain. The Sardis coin is implemented at the protocol level of the blockchain and is required for the chain to function properly. Sardis Coin is a digital tool that provides access rights to digital services Sardis Ecosystem provides. Sardis Coin is a utility token. Users grant special access for our products and services with SRDS tokens.

COIN DISTRIBUTION

Distribution of allocations as shares of total supply

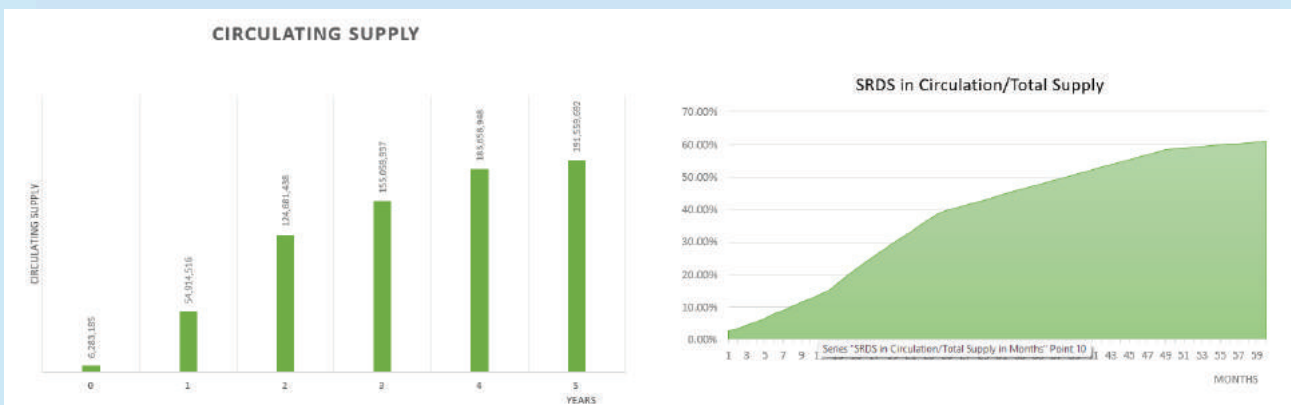

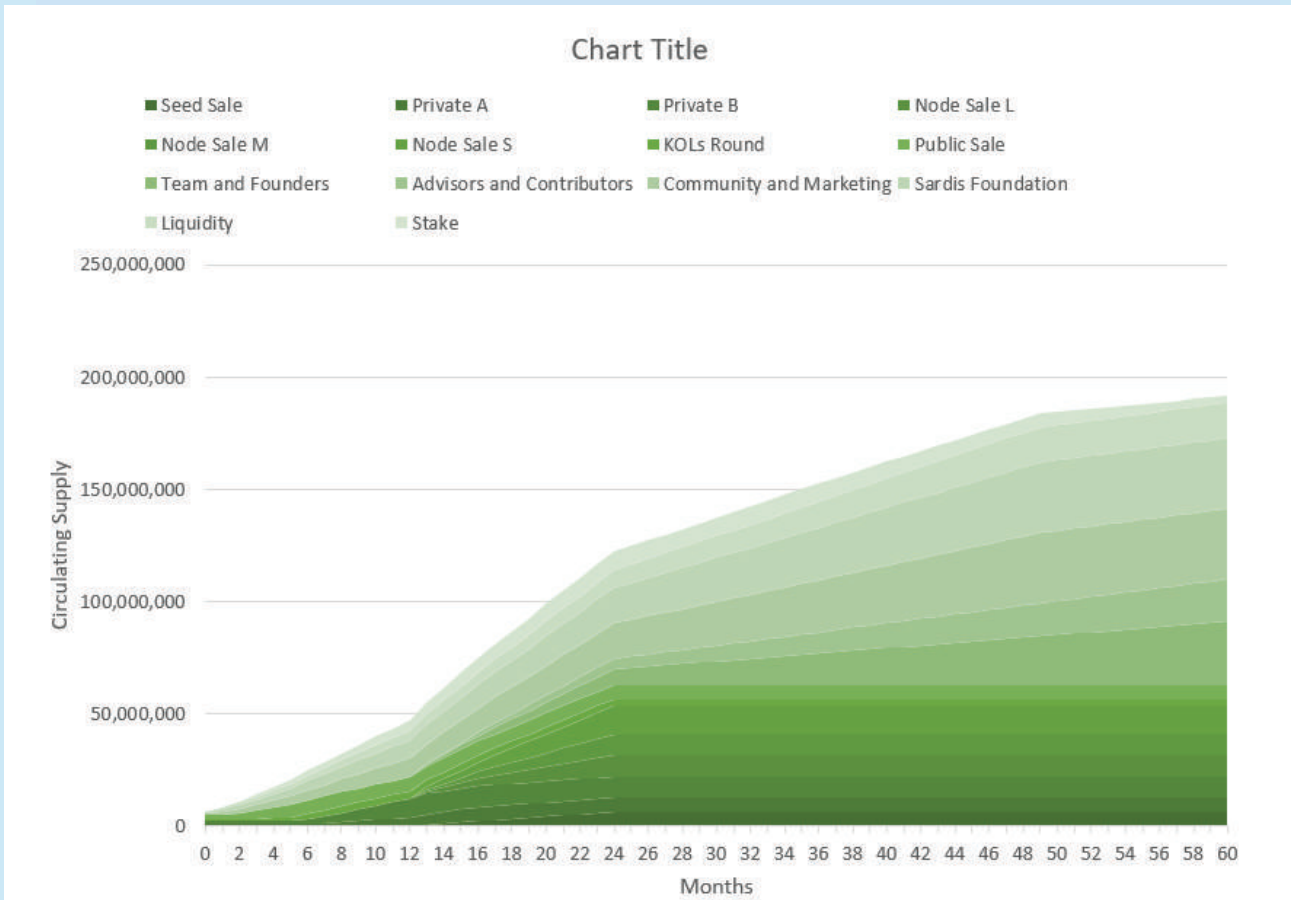

VESTING SCHEDULE

INITIAL CIRCULATING SUPPLY

Estimated circulating supply (Supposed that all tokens activated as soon as lock period expires)

Note that we supposed all tokens activated as soon as locked period expires. But this sharp cliffs shown are unlikely to result in practice. Because;

- We have no reason to believe that all nodes would exit their roles at the same time, as soon as their lock period expires.
- Unlocked token owners may choose to remain as a delegator in the system.

NODE SALE

	L Node	M Node	S Node

NODE PACKAGES

Package Name: Featherweight Package (S Node)
Package Include: 2 Nodes: 1 SRDS node and 1 SRDX node
Available Packages: 38

	SRDS Node	SRDX Node
Per Token Price:	\$0.13	\$1.00
Token Allocation Per Node:	330,694 \$SRDS	57,010 \$SRDX
Total Node Price	\$42,990	\$57,990
Total Price:	\$100,000	

Package Include:

- 42,990 \$SRDS
- 57,010 \$SRDX
- Bonus 5,000 \$SRDX (Bonus tokens will be unlocked after 18 months.)
- Complimentary 50,000 \$SRDX will be rented and staked in the node for 3 years.
- SRDX is a stable internal coin pegged to 1 US dollar.

APY: 15%

Total Revenue:

Year 1: 78,812 \$SRDX + 49,439 \$SRDS

Year 2: 98,133 \$SRDX + 56,854 \$SRDS

Year 3: 120,353 \$SRDX + 65,382 \$SRDS

Requirements:

- Minimum++ X 2 server validation rigs for SRDS and SRDX (<https://docs.sardisnetwork.com/#/consensus>)
- Compliance with POS rules of the Sardis network and active participation (<https://docs.sardisnetwork.com/#/consensus>)
- Node Servers subject to a one-time complimentary security inspection by SARDIS engineers
- Sardis Engineers can do the setup of node.

NODE PACKAGES

Package Name: Mediumweight Package (M Node)
Package Include: 2 Nodes: 1 SRDS node and 1 SRDX node
Available Packages: 11

	SRDS Node	SRDX Node
Per Token Price:	\$0.12	\$1.00
Token Allocation Per Node:	856,798 \$SRDS	147,184 \$SRDX
Total Node Price	\$102,816	\$147,184
Total Price:	\$250,000	

Package Include:

- 856,798 \$SRDS
- 147,184 \$SRDX
- Bonus 15,000 \$SRDX (Bonus tokens will be unlocked after 18 months.)
- Complimentary 100,000 \$SRDX rented and staked in the node for 3 years.
- SRDX is a stable internal coin pegged to 1 US dollar.

APY: 15%

Total Revenue:

Year 1: 201,511 \$SRDX + 985,318 \$SRDS

Year 2: 246,738 \$SRDX + 1,133,115 \$SRDS

Year 3: 298,749 \$SRDX + 1,303,083 \$SRDS

Requirements:

- Minimum++ X 2 server validation rigs for SRDS and SRDX (<https://docs.sardisnetwork.com/#/consensus>)
- Compliance with POS rules of the Sardis network and active participation (<https://docs.sardisnetwork.com/#/consensus>)
- Node Servers subject to a one-time complimentary security inspection by SARDIS engineers
- Sardis Engineers can do the setup of node.

NODE PACKAGES

Package Name: Heavyweight Package (L Node)
Package Include: 2 Nodes: 1 SRDS node and 1 SRDX node
Available Packages: 5

	SRDS Node	SRDX Node
Per Token Price:	\$0.11	\$1.00
Token Allocation Per Node:	1,884,956 \$SRDS	292,655 \$SRDX
Total Node Price	\$207,345	\$292,655
Total Price:	\$500,000	

Package Include:

- 1,884,956 \$SRDS
- 292,655 \$SRDX
- Bonus 30,000 \$SRDX (Bonus tokens will be unlocked after 18 months.)
- Complimentary 200,000 \$SRDX rented and staked in the node for 3 years.
- SRDX is a stable internal coin pegged to 1 US dollar.

APY: 15%

Total Revenue:

Year 1: 401,053 \$SRDX + 2,167,699 \$SRDS

Year 2: 491,211 \$SRDX + 2,492,854 \$SRDS

Year 3: 594,892 \$SRDX + 2,866,782 \$SRDS

Requirements:

- Minimum++ X 2 server validation rigs for SRDS and SRDX (<https://docs.sardisnetwork.com/#/consensus>)
- Compliance with POS rules of the Sardis network and active participation (<https://docs.sardisnetwork.com/#/consensus>)
- Node Servers subject to a one-time complimentary security inspection by SARDIS engineers
- Sardis Engineers can do the setup of node.
